A SUCCESSFUL, really efficient catalog scarcely needs an introduction—it speaks for itself in the nature and quality of the merchandise it offers, and in its manner of presenting that merchandise. Nevertheless, we want this our Tenth Annual Catalog, to also convey a cordial greeting to our friends and patrons—both those whom we have had the privilege of serving in the past and those whom we hope soon to have the pleasure of counting among our clientele.

We take it for granted that anyone who consults these pages is definitely interested in securing vegetable or flower seeds, bulbs, plants, etc. of the finest grade obtainable, and at reasonable—that is, fair—prices commensurate with the quality and satisfaction they represent, and in receiving at every stage of the transaction the sort of prompt, courteous, business-like treatment upon which has been built during the past decade the enviable Muller-Sealey reputation.

We therefore continue our practice of offering a *simple, straightforward, helpful, descriptive* price list of the stocks we offer—both the carefully selected, standard varieties that are generally recognized and desired as thoroughly tested, reliable standbys, and certain novelties that our growers can vouch for and recommend for your consideration as things that are “new and better.” Our variety descriptions are accurate, conservative and free from imaginative word painting. So, too, we refrain from the use of idealized illustrations; the goods we sell and the results they produce will tell the story.

Just a word about what we may refer to as Muller-Sealey or “Maximum-Satisfaction” Service. By this we mean, first, prompt, careful, exemplary handling of every order, large or small, such as can be given only by a capable, experienced personnel proud of its record, confident of its ability to maintain that standard, and equipped with every modern facility for doing so. Second, there is our exceptional ability to supply—or obtain upon request—rare, little called for plant materials which, however, when sought are wanted badly. Thirdly, we make a specialty of managing the sale of entire plant collections—both private and commercial—by bringing together buyers and sellers on grounds of common interest and mutual benefit.

We cordially solicit correspondence on questions of plant culture or horticulture generally, as well as personal visits to our conveniently located New York City offices or to our spacious, easily accessible Jersey City warehouse. And we look forward to the opportunity of helping you to enjoy your full share of the generous bounty of American horticulture.

NOVELTIES *and* SPECIALTIES in FLOWER SEEDS

NEW ICELAND POPPY Orange Brilliant

The flowers of this handsome variety are of a brilliant orange color, and entirely different from anything else that can be found in the "Nudicaule" Poppies. The habit is extremely vigorous and under good cultivation the plants will reach 2 feet in diameter. The flowers are very large, produced in great abundance, and have the advantage of flowering late when all other Poppies are over. **Pkt. \$1.00.**

CELOSIA PYRAMIDALIS PLUMOSA Improved Giant Feathered

A greatly improved strain. The plants are of perfect habit, carrying enormous feathery plumes comprising all the known colors in Celosias; offering a superb display when grown in pots in the greenhouse. **Pkt. 50c.**

MECONOPSIS BAILEYI

(One of the finest introductions of recent years)

This beautiful blue perennial Poppy throws up from its root stock half a dozen leafy stems 2-3 feet high, well furnished with broad, sea-green leaves, and bearing freely at their heads large, four-petaled blooms of a glorious sky-blue color, the effect of which is enhanced by a central zone of golden yellow anthers. Rising to a stately height, it bears flowers 5½ to 6½ inches across, consisting of wide outer petals, elegantly frilled and deeply fringed, and in the center of which appears a very double rosette about 2 inches across, the whole suggesting a crested Begonia on a giant scale. The coloring includes cerise salmon with cream center, reflecting rose, delicate pink with rose center, flushed yellow, light yellow flushed rose with canary yellow center, but there are many other charming combinations of different tints. **Pkt. 50c.**

POLYANTHUS PRIMROSE The New "Spetchley Strain"

Height 2½ feet. Fine for cutting. **Pkt. 50c.**

NEW PERENNIAL ASTER "Farreri"

Mr. Farrer, who found this beautiful perennial, described it as the most glorious Aster that he has ever seen. The color is violet-mauve with a large golden-orange disc, and the flowers measure about $2\frac{1}{2}$ to 3 inches across. **Pkt. 50c.**

ANNUALS

These play a big part in the great color schemes of brilliant beds and borders in our Summer gardens. Both for garden effect and for cutting their beauty and usefulness is equally valuable, and by careful choice as to height, color and time of blooming, effective arrangements can be made for a continuous display away into the Fall. Annuals are also effectively used in the hardy plant borders, particularly in filling in those empty spaces after Tulips, Narcissi, and other early Spring bulbs have bloomed, the seed being sown right over the bulbs.

HARDY ANNUALS. Sow in the open ground where they are intended to bloom. The seeds should be sown thinly and covered with fine soil to a greater or less depth, according to the size of the seed.

HALF-HARDY ANNUALS. The seeds should be sown in pans or frames in the early Spring, and transplanted outdoors in April or May, but previous to removal they should be hardened off by gradually exposing to the open air.

PERENNIALS and BIENNIALS

ONE of the most interesting spots in any garden is the border devoted to hardy perennials, usually called "the old-fashioned" or "grandmother's garden." Their permanent nature and delightful forms and color, their wealth of blooms and continuous display throughout the year are good reasons why perennials are general favorites with everybody.

Some professional gardeners and many amateurs prefer to raise their own hardy flowers from seed, and we think, much of the real excitement and joy in gardening is afforded in tending and nursing the little mites from babyhood. The following list is fairly representative of the choicest and rarest as well as the best old-fashioned flowers available today. (Our complete catalog of Perennial Plants mailed free on request).
